

## 3 tier terraCotta planter

This craft project is practical, relatively inexpensive and if the kids decorate the pots, each one they make will be totally unique!

### Supplies for your 3 Tier TerraCotta Planter...

You will need:

- 3 terra cotta pots - 1 small, 1 medium, 1 large
- Potting soil
- Small pebbles or rocks
- Gardening tools and gloves
- 3 of your favourite plants (seedlings in punnets work well)

### Directions...

1. Take the largest pot (which will be your base) and fill it around 2/3 full of soil. Press it gently with your fingers.
2. Put the medium pot on top of the soil in the large pot, ensuring that it is around 1/3 inside the base pot.
3. Take your first plant and place it in the soil in the base pot. Add more soil, until the roots of the plant and the lower third of the second pot are securely in the soil.
4. Repeat the above steps with the smallest pot, so that the second plant is placed into the soil of the second pot and the roots and the last pot are secure.
5. Finally, plant the remaining plant into the smallest pot and press gently.
