

Coffee Can stilts

Coffee Can Stilts are simple to make (with a little help from mom and dad) and are a great way to recycle something you may otherwise throw away!

Supplies for your coffee can stilts...

You will need:

- two 1-pound coffee cans
- drill, screwdriver or awl
- yarn
- decorations

Directions...

Turn each coffee can upside down, so that the lid is on the bottom.

Using the drill, screwdriver or awl, make two holes in the base of the can (this is where mom or dad should step in!). The holes should be on either side of the can.

Thread the rope through the holes to create loops (these will be the handles). For a cool, decorative effect, you can twist or braid several yarn strands together instead of using rope.

Tie the yarn or rope off inside the cans. You should aim for the loops to be at your child's waist height when standing on the cans.

Decorate the cans using paints, glue, stickers, glitter... anything your child likes!
