

Dyeing Pasta

Supplies for your Coloured Pasta

You will need:

- snap-lock bags
- food colouring
- white vinegar
- pasta in a variety of shapes
- baking paper and a tray for drying

Directions...

1. Gather your supplies together and prepare your workspace. Place some of your pasta into each of your snap-lock bags.
2. Add a tablespoon of vinegar to the bag and as many drops of the food colouring as you need to get the colour you want. Close the zip lock and shake and mush the bag until all of the pasta is covered with the colour mix.
3. Tip the contents of the bag onto your drying tray and separate the pasta so that it does not stick together when it dries. Leave your pasta for a couple of hours to thoroughly dry.
4. When the pasta is dry you can store it in a plastic container until you are ready to use it.
