

French Knitting for Kids

Supplies for your French Knitting

You will need:

- French knitting spool / tool
- a ball of yarn (more than one if you want to change colours)
- safety scissors

... and that is all you need.

Directions...

1. Thread the tail of your yarn through the centre of your spool.
2. Wind the yarn around each of the pegs at the top of the spool. I go clock-wise, but I don't think it really matters.
3. Wrap the yarn around the first peg, use the hand tool to lift the original stitch on the peg up and over the wrapped yarn and let it fall to the back of the peg. Repeat for the other three pegs to finish your first row.
4. Give the tail of your yarn at the base of your spool a gentle tug and repeat the previous step until your knitting is the length you desire. Cut the yarn and thread the tail through each stitch to tie off.

And you are done...
