

# Stained Glass Window Sticker

## Supplies for your Window Sticker

You will need:

- Card - black is traditional but you can use card of any colour
- Small quantities of Cellophane in several different colours (you can use tissue paper if you don't have cellophane)
- Safety scissors
- Clear contact
- Butterfly template (optional)

## Directions...

1. Cut out a frame using the black card or you can cut out the butterfly shape in the stained glass butterfly template like I did.
2. Grab your roll of contact and peel back the backing to expose the sticky side, place your frame or butterfly shape on the contact and make sure it is stuck down firmly. Trim the excess around the edge of your shape leaving approximately 4 cm around the shape. *(You need a fairly decent edge area so that you can stick the stained glass picture to the window.)*
3. If you haven't already, cut your cellophane (or tissue paper) into small pieces. You can either just cut out odd shapes or cut them all into squares or rectangles. Start placing the small pieces onto the sticky contact paper and press down so it sticks to the contact.
4. Once you and the kids have covered the area inside your shape or frame, your stained glass window sticker is ready to apply to the window. Make sure the window is clean, dry and dust free and then use the sticky edge around your window sticker to adhere it to the window.

**Hint:** To use the template you can either print it directly onto your card (if you have a printer than can handle it) or you can print on A4 paper and cut out the shapes to use as a template. Just draw around the shapes on the card and then cut them out. If you are using black card, you can use a tailors chalk or a quilters chalk pencil to do the outline.
